

Creating and Managing Strong Passwords

What is it?

A strong password is secret statement that you are assigning for the security of your account. This account may be your social media account, this may be your banking account. A strong password will help us to become safer from the Black Hat Hacker or a bad persons.

Key Guidelines:

- Password must be 16 characters long.
- Use special characters (@!#\$%^&*)
- Avoiding personal info
- Using password managers

Common Mistakes:

- Don't use same password
- Using predictable passwords
- Using easy password like "123456", etc.

Use Random:

- Combine random words a password
- Use Password like "Yuc8\$RikA34%ZoPPao98t"
- Using "123456", etc.

Best Password Manager:

- Bitwarden

Stats & Facts:

- **Nearly 1 in 4 individuals were affected by a data breach in the last 18 months.** (Bitwarden)
